

Bathtub Sailboat

Make your own bathtub sailboats using items from around the house and have a fun race in the bathtub!

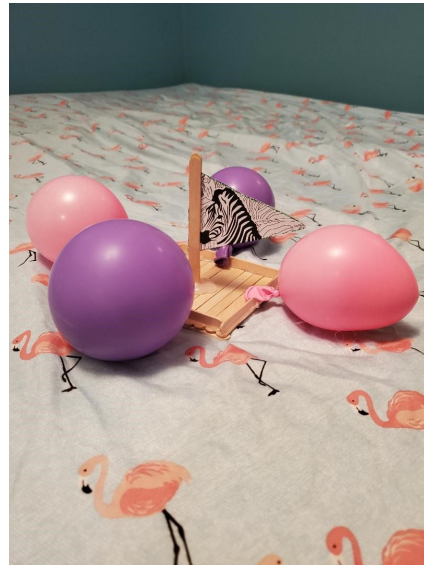

You can use:

Popsicle sticks
Balloons
Tinfoil
Cardboard
Straws
Paper
Glue
Tape
String
Paper plates
Styrofoam cups
Anything you can get
your hands on - be
creative!

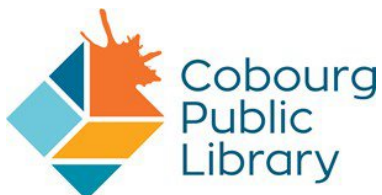

We used:

Popsicle sticks
Balloons
Cardboard
Decorative
paper
Hot glue gun
Scissors

Try making more than one sailboat using different materials and techniques for each. After placing your sailboats in the tub of water, use a straw (or just some good, old-fashioned lung power) to blow on the boats until they reach the finish line! Whoever reaches first wins! Experiment with different materials to see which things work the best at making your boat the fastest. Have fun!
