Delivering on Retaining our Businesses and Laying the Groundwork for Investment Readiness

Our economic development and Venture13 team has been making considerable progress by year-end. This past fall there were several economic development and Venture13 programs delivered to the business community. Our team addressed topics such as:

- Local business successes
- Real estate and development applications
- Cybersecurity and anti-fraud
- Heritage building preservation
- Business succession planning and
- Conflict resolution.

This type of economic development and business innovation programming served as foundational knowledge sharing in alignment with our 2023-2028 strategy and action plan and hit on key deliverables that you can come to expect from our team.

By year-end, our team had issued a winter programming news release. I hope to connect with you at one of our presentations in the coming winter months. For Economic Development programming registration and more information, please subscribe to our newsletter. For Venture13 programming registration and more information, please visit venture13.ca.

The Town of Cobourg Development Dashboard was also published during the fall months. It's worth checking to see the status of development application in the Town of Cobourg. Simply use your mouse or finger to click on a property and review the development application. You will be able to review the address, proposal for the site, site plan drawings and much more. This website enhancement improves our investment readiness by providing detailed information about development applications in the pipeline. There are other applications in the pipeline too. The intent is to update the dashboard periodically to stay current and a serve as a trustworthy source for new development projects.
