

Fall Leaf Rubbing

Supplies Needed: tree leaves in various shapes and sizes, white paper, and crayons

Steps:

1. Gather the supplies needed.
2. Select the leaves that you would like to use and arrange them under a sheet of white paper.
3. Next, select a crayon and if necessary remove it's paper label. You will be using the side of the crayon, not the tip.
4. Use one hand to press down onto the white paper with the leaf. Using your other hand, begin rubbing the side of the crayon on the paper.
5. You should see the imprint of the leaves appearing on your paper. If you wish, you can also change crayon colours.
6. When your art is complete, display it somewhere special for your family to enjoy.
