

Paper Ninja Stars

Materials Needed: coloured paper, scissors

Steps:

1. Fold the 8.5" by 11" paper diagonally to make a square piece of paper. Trim off the extra paper below the square using scissors.

2. Fold the paper in half, then fold it in half again.

3. Now fold the paper length-wise in the middle to form a crease. Fold each top half over to the side, but in opposite directions.

4. Fold each top half over to the side in the same way, but the opposite direction of how you first folded the paper.

5. Now lay the papers on top of each other, as shown.

6. Fold the top yellow corner over, along the visible crease and tuck it into the white triangle on the left-hand side. Repeat for the bottom yellow piece.

7. Flip the paper over and repeat for the white side.

8. You are finished folding. Decorate your ninja star with markers, stickers or stamps. Have fun!
