

Magnet Maze

STEAM PROJECT FOR KIDS!

Supplies Needed:

- cardboard
- popsicle sticks
- glue or tape
- magnet
- metal paper clip
- markers (optional)
- cut-out to attach to paper clip (optional)

Instructions:

1. Cut a square from a cardboard box (make sure that the cardboard isn't too thick or the magnet won't work through it).
2. Design your maze using popsicle sticks. Glue the popsicle sticks in place.
3. Colour or decorate your maze.
4. Attach an animal or vehicle to your paperclip with glue or tape
5. Take your magnet and hold it underneath the cardboard. The paperclip will attach to the magnet and you can make the paperclip go through the maze!
6. Add different things to your maze to make it more difficult (ex. pac-man eating dots and fruit).
7. Have fun!

Check out www.explainthatstuff.com/magnetism to learn more about how magnets work.
