Woman on the Edge by Samantha M. Bailey

"Take my baby.

I flinch at the brittle, scratchy voice. I'm standing on the subway platform as I do every day after work, waiting for the train to come. I used to try to smile at people, but I'm warier now. Ever since my husband, Ryan, died, no one knows how to act around me, and I don't know how to act around them."

Gripped from the first lines, this a book you could finish in one sitting. Fast paced page turning thriller told from in two person narrative. The present is narrated by Morgan, a recently widow with a troubled past and before is told by success, happily married Nicole who gives her newborn child to Morgan then jumps.

Nicole address Morgan by her name, claims to know her, and wants her to keep her child safe. After Nicole jumps Morgan becomes a person of interest in Nicole death, was it a suicide or was she pushed by Morgan? What secrets do both women harbour that they don't want to share with anyone?

A thrilling stay up late so I can finish novel.
