Section Three:
HERITAGE PERMIT APPLICATION GUIDE

HERITAGE PERMIT APPLICATION GUIDE

Heritage Permits

A Heritage Permit is required to undertake changes to properties designated under the *Ontario Heritage Act*. Properties are either designated individually under Part IV of the *Act* or are designated within a Heritage Conservation District under Part V of the *Act*. **A designated property is defined in the *Act* as real property, and the buildings and structures on the real property.**

The *Ontario Heritage Act* outlines the process by which to ensure that any changes to a designated property do not alter the property in such a way that the reasons for designation are diminished. Internal changes to a building on a designated property do not require a Heritage Permit if the alterations do not affect the external appearance of the designated property. An exception to this is individually designated properties whose designation by-law outlines specific interior elements to be preserved.

Any work undertaken that alters or changes the appearance of the real property and the buildings and structures on the real property requires a Heritage Permit, including:

- All additions and alterations to structures on the property
- All new construction
- Landscaping and/or alteration of the real property
- Demolition of structures on the property

Examples of work that **require** a Heritage Permit include:

- Addition or alteration to an existing structure on the property
- Replacement of windows or doors
- Change in window or door openings
- Removal and/or installation of porches, verandahs, canopies, cladding and chimneys
- Change in trim, cladding and painting of building exterior
- Removal and/or installation of a deck, fence, gate, trellis, arbours and/or gazebos

Examples of work that **do not require** a Heritage Permit include:

- Routine maintenance and minor repairs that do not change the appearance of the structures and/or the real property
- Re-roofing in material, colour and shape similar to existing material, colour and shape
- Re-painting of architectural elements in the same colour
- Repairs to, and replacement of eaves troughs and downspouts unless these are ornamental and integral to the heritage character and appearance of the building
- Re-pointing of brick and repairs to chimney

Heritage Permit Applications for demolition, relocation or de-designation of heritage properties are discouraged and are generally not supported by staff, Cobourg Heritage Committee (CHC) or by Town Council.

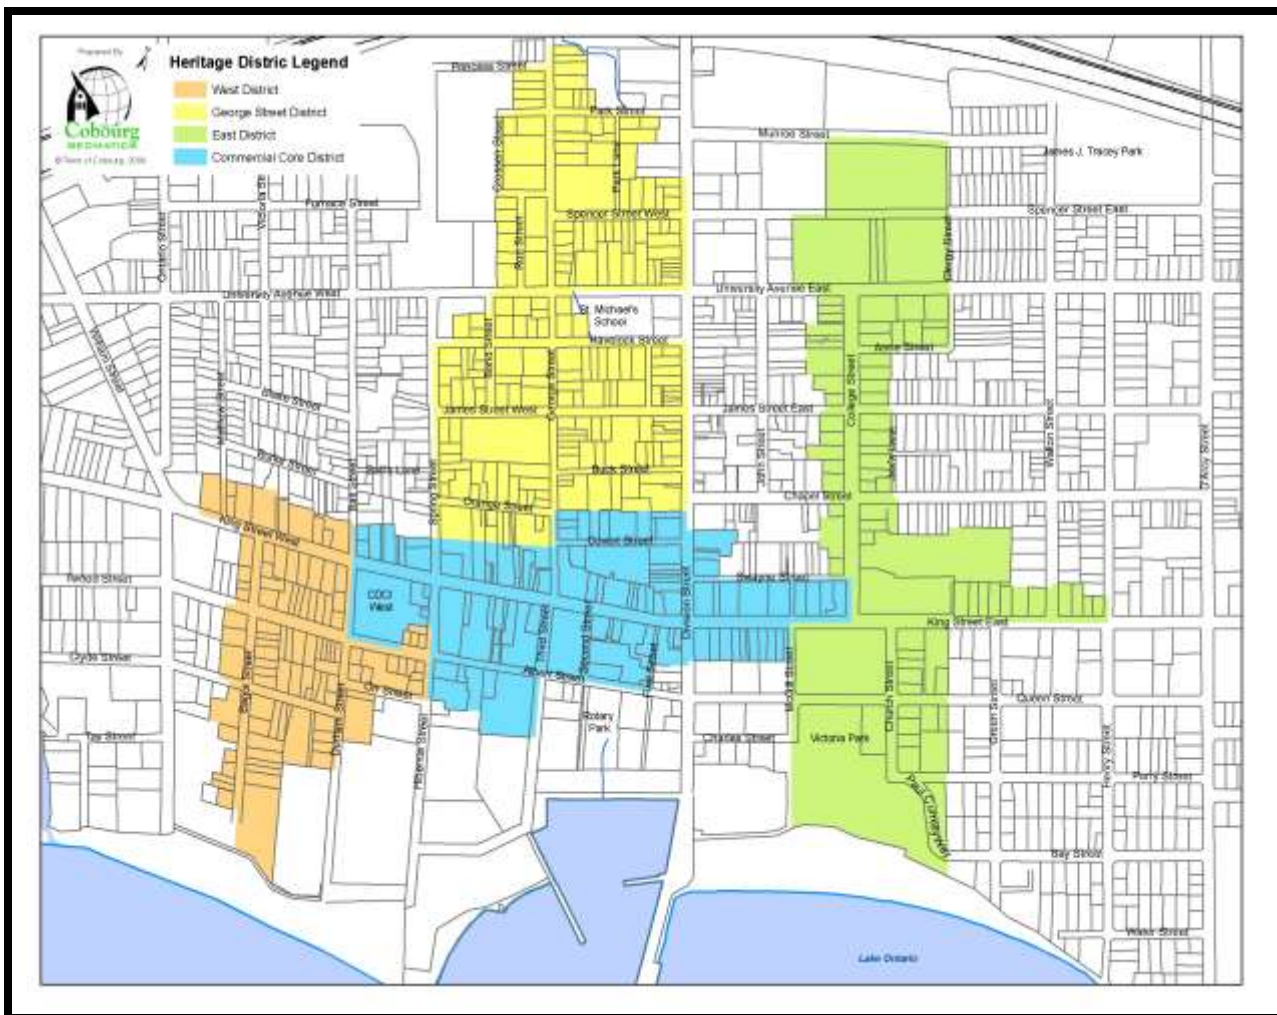

Heritage Guidelines

Heritage Permit Applications are reviewed with the consideration of the Council-approved Heritage Conservation District Plans and designating by-laws of individual properties.

There are approximately 45 properties in Cobourg which are individually designated under Part IV of the *Ontario Heritage Act*. Each designated property has a by-law that provides the reasons for designation and lists the property's heritage attributes.

In addition to individually designated properties, there are four Heritage Conservation Districts: West District, East District, Commercial Core District, and George Street District. There are approximately 500 properties in the four districts. Below is a map showing the boundaries of the four districts. Each district has a Heritage Conservation District Plan approved by Council. These are available through the Planning Department. Reference can also be made to the Municipal By-laws which established the districts and the Town of Cobourg's Heritage Master Plan.

In total, there are over 600 individual and district designated properties which require a heritage permit when undertaking alterations to the property.

In general, alterations to a heritage property must have regard for:

- Individual designation by-law or the Heritage Conservation District Plan
- Heritage attributes of the property or the district
- Role and character of the property
- Architectural style and the period in which the structure was built
- Appropriate scale and massing
- Streetscape, vistas, vegetation and trees that define the presence and location of the property
- Preference for restoration of features and details instead of replacement
- Preference for restoration of doors, windows and trim instead of replacement
- Compatibility in material, style and colour of existing architectural components

In general, any new building on a designated property must have regard for:

- Contextual scale, massing, character, architectural style, setbacks and building height of the original structure and/or the heritage fabric within the district
- Impact on the streetscape and the visual properties of the neighbourhood
- The use of wood windows, doors and trim compatible with existing heritage buildings in the neighbourhood
- Landscaping that reflects the heritage character of the neighbourhood and/or the property

Committee Approval

For alterations which are more extensive or otherwise complex, approval is given by Cobourg Heritage Committee (CHC) and subsequently by Council. Additionally, if a minor application has not received approval by staff or has received approval with conditions that the applicant does not agree with, the Cobourg Heritage Committee (CHC) is a municipal advisory committee which makes recommendations to Council on heritage-related matters. The Committee is constituted under Section 28 of the *Ontario Heritage Act*. For applications considered by Cobourg Heritage Committee (CHC), Council makes the final decision whether to approve or not to approve the Heritage Permit.

Where a Heritage Permit Application requires approval by Cobourg Heritage Committee (CHC) and Council, the following are the steps that an application typically goes through:
